

Publication list, Uwe-Jens Wiese

Nuclear and Particle Physics

1. 2 and 3 cochains in 4-dimensional $SU(2)$ gauge theory,
Commun. Math. Phys. 103 (1986) 693,
with M. L. Laursen and G. Schierholz.
2. Topological charge of (lattice) gauge fields,
Commun. Math. Phys. 107 (1986) 467,
with M. Göckeler, M. L. Laursen and G. Schierholz.
3. Microscopic nuclear structure with sub-baryonic degrees of freedom: quarks form a dibaryon,
Nucl. Phys. A465 (1987) 686,
with P. U. Sauer.
4. Solution of a symmetry conserving chiral soliton model for nucleon and delta,
Z. Phys. A326 (1987) 339,
with K. Goeke, F. Grümmer, M. Harvey and J. N. Urban.
5. High statistics computation of the topological susceptibility of $SU(2)$ gauge theory,
Nucl. Phys. B292 (1987) 330,
with A. S. Kronfeld, M. L. Laursen and G. Schierholz.
6. Topology in $SU(3)$ lattice gauge theory: first calculation of the topological susceptibility,
Nucl. Phys. B292 (1987) 349,
with M. Göckeler, A. S. Kronfeld, M. L. Laursen and G. Schierholz.
7. Topology and dynamics of the confinement mechanism,
Nucl. Phys. B293 (1987) 461,
with A. S. Kronfeld and G. Schierholz.
8. Monopole condensation and color confinement,
Phys. Lett. B198 (1987) 516,
with A. S. Kronfeld, M. L. Laursen and G. Schierholz.
9. Confinement and the dynamics of magnetic monopoles,
Nucl. Phys. B (Proc. Suppl.) 4 (1988) 358.
10. Scaling behavior and volume dependence of the $SU(2)$ topological susceptibility
Nucl. Phys. B305 (1988) 109,
with M. Kremer, A. S. Kronfeld, M. L. Laursen, G. Schierholz and C. Schleiermacher.

11. The $SU(3)$ topological susceptibility as a probe of scaling,
Phys. Lett. 209B (1988) 315,
with M. Göckeler, A. S. Kronfeld, M. L. Laursen and G. Schierholz.
12. The θ vacuum in $SU(2)$ lattice gauge theory,
Nucl. Phys. B305 (1988) 661,
with A. S. Kronfeld, M. L. Laursen, G. Schierholz and C. Schleiermacher.
13. Identification of resonance parameters from the finite volume energy spectrum,
Nucl. Phys. B (Proc. Suppl.) 9 (1988) 609.
14. Numerical simulation of lattice θ vacua: The 2-d $U(1)$ gauge theory as a test case,
Nucl. Phys. B318 (1989) 153.
15. A vectorized code for the computation of the topological charge in $SU(2)$ lattice gauge theory,
Comput. Phys. Commun. 54 (1989) 109,
with A. S. Kronfeld, M. L. Laursen, G. Schierholz and C. Schleiermacher.
16. Can the topological susceptibility be calculated from $SU(N)$ lattice gauge theories?
Phys. Lett. B233 (1989) 192,
with M. Göckeler, A. S. Kronfeld, M. L. Laursen and G. Schierholz.
17. The topological susceptibility: A comparison of cooling, blocking and the geometric method,
Nucl. Phys. B (Proc. Suppl.) 17 (1989) 6309.
18. QED: A lattice investigation of the chiral phase transition and the nature of the continuum limit,
Nucl. Phys. B334 (1990) 527,
with M. Göckeler, R. Horsley, E. Laermann, P. Rakow, G. Schierholz and R. Sommer.
19. The continuum limit of QED: Renormalization group analysis and question of triviality,
Phys. Lett. B251 (1990) 567,
with M. Göckeler, R. Horsley, E. Laermann, P. Rakow, G. Schierholz and R. Sommer.
20. Monopole condensate and monopole mass in $U(1)$ lattice gauge theory,
Nucl. Phys. B356 (1991) 629,
with L. Polley.
21. The monopole constraint effective potential in $U(1)$ lattice gauge theory,
Phys. Lett. 253B (1991) 212,
with M. I. Polikarpov and L. Polley.

22. $SU(N)$ gauge theories with C-periodic boundary conditions: 1. Topological structure
Nucl. Phys. B357 (1991) 521,
with A. S. Kronfeld.
23. Color confinement, Abelian dominance and the dynamics of magnetic monopoles in $SU(3)$ gauge theory,
Phys. Lett. B272 (1991) 319,
with F. Brandstaeter and G. Schierholz.
24. Monopoles, gluons and the use of C-periodic lattice gauge fields,
Nucl. Phys. B (Proc. Suppl.) 20 (1991) 24.
25. Measuring the renormalized charge in QED,
Nucl. Phys. B (Proc. Suppl.) 20 (1991) 639,
with R. Horsley, M. Göckeler, E. Laermann, P. Rakow, G. Schierholz and R. Sommer.
26. Cluster algorithms and scaling in $CP(3)$ and $CP(4)$ models,
Nucl. Phys. B370 (1992) 762,
with K. Jansen.
27. C- and G-periodic QCD at finite temperature,
Nucl. Phys. B375 (1992) 45.
28. $Z(3)$ -instantons in models for wetting of hot gluons,
Nucl. Phys. B372 (1992) 703,
with T. Trappenberg.
29. Gauge fixing on the lattice without ambiguity,
Phys. Lett. B289 (1992) 122,
with J. C. Vink.
30. A multicanonical algorithm for $SU(3)$ pure gauge theory,
Phys. Lett. B293 (1992) 175,
with B. Grossmann, M. L. Laursen and T. Trappenberg.
31. Wetting of hot gluons,
Int. Jour. Mod. Phys. C3 (1992) 939.
32. Chern-Simons term in the four-dimensional $SU(2)$ Higgs model,
Int. Jour. Mod. Phys. C3 (1992) 811,
with F. Karsch, M.L. Laursen, T. Neuhaus and B. Plache.
33. The confined-deconfined interface tension and the spectrum of the transfer matrix,
Nucl. Phys. B396 (1993) 584,
with B. Grossmann, M. L. Laursen and T. Trappenberg.

34. Continuum gauge fields from lattice gauge fields,
Nucl. Phys. B404 (1993) 839,
with M. Göckeler, A. S. Kronfeld and G. Schierholz.
35. Cosmic strings on the lattice,
Nucl. Phys. B (Proc. Suppl.) 30 (1993) 723,
with A. Bukenov, A. Pochinsky, M. Polikarpov and L. Polley.
36. The confined-deconfined interface tension, wetting, and the spectrum of the transfer matrix,
Nucl. Phys. B (Proc. Suppl.) 30 (1993) 865,
with B. Grossmann, M. L. Laursen and T. Trappenberg.
37. The interface tension in quenched QCD at the critical temperature,
Nucl. Phys. B (Proc. Suppl.) 30 (1993) 869,
with B. Grossmann, M. L. Laursen and T. Trappenberg.
38. $SU(N)$ gauge theories with C-periodic boundary conditions: 2. small volume dynamics,
Nucl. Phys. B401 (1993) 190,
with A. S. Kronfeld.
39. Bosonization and cluster updating of lattice fermions,
Phys. Lett. B311 (1993) 235.
40. Fixed point actions for Wilson fermions,
Phys. Lett. B315 (1993) 417.
41. Quantum global strings on the lattice,
Phys. At. Nucl. 56 (1993) 122, (Yad. Fiz. 56 (1993) No. 1 214),
with A. K. Bukenov, M. I. Polikarpov and A. V. Pochinskii.
42. String representation of Abelian Higgs theory and Aharonov-Bohm effect on the lattice,
Phys. Lett. B309 (1993) 133,
with M. I. Polikarpov and M. A. Zubkov.
43. Fixed point actions for lattice fermions,
Nucl. Phys. B (Proc. Suppl.) 34 (1994) 516,
with W. Bietenholz.
44. Fixed point actions for lattice field theories,
In Wendisch-Rietz 1993, Proceedings, Theory of elementary particles, 135.
45. Perfect lattice actions for the Gross-Neveu model,
Nucl. Phys. B (Proc. Suppl.) 42 (1995) 790,
with W. Bietenholz and E. Focht.

46. Perfect lattice actions for the Gross-Neveu model at large N ,
Nucl. Phys. B436 (1995) 385,
with W. Bietenholz and E. Focht.
47. Towards a perfect fixed point action for $SU(3)$ gauge theory,
Nucl. Phys. B (Proc. Suppl.) 42 (1995) 67,
with T. DeGrand, A. Hasenfratz, P. Hasenfratz and F. Niedermayer.
48. A perturbative construction of lattice chiral fermions,
Phys. Lett. B378 (1996) 222,
with W. Bietenholz.
49. Perfect lattice actions with and without chiral symmetry,
Nucl. Phys. B (Proc. Suppl.) 47 (1996) 575,
with W. Bietenholz.
50. Perfect lattice actions for quarks and gluons,
Nucl. Phys. B464 (1996) 319,
with W. Bietenholz.
51. Progress on perfect lattice actions for QCD,
Nucl. Phys. (Proc. Suppl.) 53 (1997) 921,
with W. Bietenholz, R. Brower and S. Chandrasekharan.
52. Quantum link models: a discrete approach to gauge theories,
Nucl. Phys. B492 (1997) 455,
with S. Chandrasekharan.
53. Perfect lattice actions for staggered fermions,
Nucl. Phys. B495 (1997) 285,
with W. Bietenholz, R. Brower and S. Chandrasekharan.
54. Quark confinement in C-periodic cylinders at temperatures above T_c ,
Phys. Lett. B415 (1997) 179,
with K. Holland.
55. Perfect lattice topology: the quantum rotor as a test case,
Phys. Lett. B407 (1997) 283,
with W. Bietenholz, R. Brower and S. Chandrasekharan.
56. The large N perfect action applied to the two-dimensional $O(3)$ model,
Nucl. Phys. (Proc. Suppl.) 53 (1997) 948,
with A. Tsapalis.
57. The perfect quark-gluon vertex function,
Nucl. Phys. B (Proc. Suppl.) 63A-C (1998) 904,
with W. Bietenholz, R. Brower, S. Chandrasekharan and K. Orginos.

58. D-Theory: field theory via dimensional reduction of discrete variables,
Nucl. Phys. B (Proc. Suppl.) 63A-C (1998) 775,
with B. B. Beard, R. C. Brower, S. Chandrasekharan, D. Chen and A. Tsapalis.
59. Quark confinement in the deconfined phase,
Nucl. Phys. B (Proc. Suppl.) 63A-C (1998) 448,
with K. Holland.
60. Perfect actions with chemical potential,
Phys. Lett. B426 (1998) 114,
with W. Bietenholz.
61. Complete wetting in supersymmetric QCD or why QCD strings can end on domain walls,
Phys. Rev. Lett. 81 (1998) 2420,
with A. Campos and K. Holland.
62. Complete wetting of gluons and gluinos,
Phys. Lett. B443 (1998) 338,
with A. Campos and K. Holland.
63. Quantum spins and quantum links,
Prog. Theor. Phys. Suppl. 131 (1998) 483.
64. QCD strings ending on domain walls: a complete wetting phenomenon in SUSY QCD,
Nucl. Phys. (Proc. Suppl.) 73 (1999) 438,
with A. Campos and K. Holland.
65. Quantum spins and quantum links: the D-theory approach to field theory,
Nucl. Phys. (Proc. Suppl.) 73 (1999) 146.
66. Meron-Cluster solution of fermion sign problems,
Phys. Rev. Lett. 83 (1999) 3116,
with S. Chandrasekharan.
67. Meron-cluster simulation of a chiral phase transition with staggered fermions,
Nucl. Phys. B576 (2000) 481,
with S. Chandrasekharan, J. Cox and K. Holland.
68. Meron-cluster solution of fermion and other sign problems,
Nucl. Phys. (Proc. Suppl.) 83 (2000) 777,
with S. Chandrasekharan, J. Cox, C. Gattringer, K. Holland and B. Scarlet.
69. QCD as a quantum link model,
Phys. Rev. D60 (1999) 094502,
with R. Brower and S. Chandrasekharan.

70. Quantum spin formulation of the principal chiral model,
Nucl. Phys. (Proc. Suppl.) 83 (2000) 718,
with B. Schlittgen.
71. Flop transitions in cuprate and color superconductors: from $SO(5)$ to $SO(10)$
unification?
Nucl. Phys. (Proc. Suppl.) 94 (2001) 449,
with S. Chandrasekharan, V. Chudnovsky, and B. Schlittgen.
72. The center symmetry and its spontaneous breakdown at high temperatures,
published in Festschrift in honor of B. L. Ioffe, “At the frontier of Particle Physics/
Handbook of QCD”, edited by M. Shifman,
with K. Holland.
73. Low-energy effective theories of quantum spin and quantum link models,
Phys. Rev. D63 (2001) 085007,
with B. Schlittgen.
74. Solution of the complex action problem in the Potts model for dense QCD,
Nucl. Phys. B602 (2001) 61,
M. G. Alford, S. Chandrasekharan, and J. Cox.
75. Can one see the number colors?
Nucl. Phys. B609 (2001) 225,
with O. Bär.
76. Physical observables from lattice QCD at fixed topology,
Nucl. Phys. (Proc. Suppl.) 106 (2002) 581,
with R. Brower, S. Chandrasekharan, and J. Negele.
77. Quantum link models with many rishon flavors and with many colors,
Nucl. Phys. (Proc. Suppl.) 106 (2002) 1019,
with O. Bär, R. Brower, and B. Schlittgen.
78. Solution of a complex action problem at non-zero chemical potential,
Nucl. Phys. A702 (2002) 211.
79. Confinement without a center: the exceptional group $G(2)$,
Nucl. Phys. (Proc. Suppl.) 119 (2003) 652,
with K. Holland, P. Minkowski, and M. Pepe.
80. QCD at fixed topology,
Phys. Lett. B560 (2003) 64,
with R. Brower, S. Chandrasekharan, and J. Negele.
81. Exceptional confinement in $G(2)$ gauge theory,
Nucl. Phys. B668 (2003) 207,
with K. Holland, P. Minkowski, and M. Pepe.

82. Nonlinear realization of chiral symmetry on the lattice,
JHEP 0312 (2003) 035,
with S. Chandrasekharan, M. Pepe, and F. Steffen.
83. Naturally light fermions from dimensional reduction,
Nucl. Phys. (Proc. Suppl.) 129 (2004) 868,
with W. Bietenholz and A. Gfeller.
84. When is the deconfinement phase transition universal?
Wako 2003, Color confinement and hadrons in quantum chromodynamics,
with K. Holland and M. Pepe.
85. The deconfinement phase transition in Yang-Mills theory with general Lie group
 G ,
Nucl. Phys. (Proc. Suppl.) 129 (2004) 712,
with K. Holland and M. Pepe.
86. Lattice theories with nonlinearly realized chiral symmetry,
Nucl. Phys. (Proc. Suppl.) 129 (2004) 507,
with S. Chandrasekharan, M. Pepe, and F. Steffen.
87. Dimensional reduction of fermions in brane worlds of the Gross-Neveu model,
JHEP 0310 (2003) 018,
with W. Bietenholz and A. Gfeller.
88. D-theory: field quantization by dimensional reduction of discrete variables,
Nucl. Phys. B693 (2004) 149,
with R. Brower, S. Chandrasekharan, and S. Riederer.
89. Pions versus magnons: from QCD to antiferromagnets and quantum Hall ferro-
magnets,
Nucl. Phys. B686 (2004) 347,
with O. Bär and M. Imboden.
90. The deconfinement phase transition of $Sp(2)$ and $Sp(3)$ Yang-Mills theories in
($2 + 1$) and ($3 + 1$) dimensions,
Nucl. Phys. B694 (2004) 35,
with K. Holland and M. Pepe.
91. Cluster algorithm solution of sign and complex action problems,
Int. J. Mod. Phys. B17 (2003) 5435.
92. An introduction to chiral symmetry on the lattice,
Prog. Part. Nucl. Phys. 53 (2004) 373,
with S. Chandrasekharan.

93. Study of $CP(N - 1)$ θ -vacua by cluster-simulation of $SU(N)$ quantum spin ladders,
Phys. Rev. Lett. 94 (2005) 010603,
with B. B. Beard, M. Pepe, and S. Riederer.
94. Study of the 2-D $CP(N - 1)$ models at $\theta = 0$ and π ,
Nucl. Phys. (Proc. Suppl.) 140 (2005) 805,
with B. B. Beard, M. Pepe, and S. Riederer.
95. Anomalous electromagnetism of pions and magnons,
Nucl. Phys. (Proc. Suppl.) 141 (2005) 143.
96. An efficient cluster algorithm for $CP(N - 1)$ models,
PoS LAT2005 (2006) 113,
with B. Beard, M. Pepe and S. Riederer.
97. Efficient cluster algorithm for $CP(N - 1)$ models,
Comput. Phys. Commun. 175 (2006) 629.
with B. Beard, M. Pepe and S. Riederer.
98. A new efficient cluster algorithm for the Ising model,
PoS LAT2005 (2006) 112,
with M. Nyfeler and M. Pepe.
99. The status of D-theory,
PoS LAT2005 (2006) 281.
100. D-theory: A quest for nature's regularization,
Nucl. Phys. Proc. Suppl. 153 (2006) 336.
101. Exceptional deconfinement in $G(2)$ gauge theory,
Nucl. Phys. B768 (2007) 21,
with M. Pepe.
102. Rotor spectra, Berry phases, and monopole fields: from antiferromagnets to QCD,
Phys. Rev. D78 (2008) 077901,
with S. Chandrasekharan, F.-J. Jiang, and M. Pepe.
103. Rotor spectra, Berry phases, and monopole fields: from antiferromagnets to QCD,
PoS LAT2008 (2008) 004.
104. Revisiting the deconfinement phase transition in $SU(4)$ Yang-Mills theory in 2+1 dimensions,
JHEP 0802 (2008) 041,
with K. Holland and M. Pepe.

105. From decay to complete breaking: pulling the strings in $SU(2)$ Yang-Mills theory, Phys. Rev. Lett. 102 (2009) 191601, with M. Pepe.
106. The decay of unstable strings in $SU(2)$ Yang-Mills theory, PoS LAT2009 (2009) 225, with M. Pepe.
107. The width of the confining string in Yang-Mills theory, Phys. Rev. Lett. 104 (2010) 232001, with F. Gliozzi and M. Pepe.
108. The width of the color flux tube at 2-loop order, JHEP 1011 (2010) 053, with F. Gliozzi and M. Pepe.
109. Topological lattice actions, JHEP 1012 (2010) 020, with W. Bietenholz, U. Gerber, and M. Pepe.
110. Linear broadening of the confining string in Yang-Mills theory at low temperature, JHEP 1101 (2011) 057, with F. Gliozzi and M. Pepe.
111. The confining string: Lattice results versus effective field theory, Prog. Part. Nucl. Phys. 67 (2012) 117.
112. Non-trivial θ -vacuum effects in the 2-d $O(3)$ model, JHEP 1204 (2012) 117, with M. Bögli, F. Niedermayer, and M. Pepe.
113. Study of θ -vacua in the 2-d $O(3)$ model, PoS LAT2012 (2012) 228, with M. Bögli, F. Niedermayer, and M. Pepe.
114. Walking near a conformal fixed point: the 2-d $O(3)$ model at θ near π as a test case, Phys. Rev. D86 (2012) 075006, with P. de Forcrand and M. Pepe.
115. Drastic reduction of cut-off effects in 2-d lattice $O(N)$ models, JHEP 1211 (2012) 140, with J. Balog, F. Niedermayer, M. Pepe, and P. Weisz.
116. Atomic quantum simulation of dynamical gauge fields coupled to fermionic matter: from string breaking to evolution after a quench,

- Phys. Rev. Lett. 109 (2012) 175302,
with D. Banerjee, M. Dalmonte, M. Müller, E. Rico, P. Stebler, and P. Zoller.
117. Atomic quantum simulation of $U(N)$ and $SU(N)$ non-Abelian gauge theories,
Phys. Rev. Lett. 110 (2013) 125303,
with D. Banerjee, M. Bögli, M. Dalmonte, E. Rico, P. Stebler, and P. Zoller.
118. Topological lattice actions for the 2-d XY model,
JHEP 1303 (2013) 141,
with W. Bietenholz, M. Bögli, F. Niedermayer, M. Pepe, and F. G. Rejon-Barrera.
119. Ultracold quantum gases and lattice systems: Quantum simulation of lattice gauge theories,
Annalen Phys. 525 (2013) 777.
120. $O(N)$ models with topological lattice actions,
PoS LATTICE2013 (2014) 051,
with W. Bietenholz, M. Bögli, U. Gerber, F. Niedermayer, M. Pepe, and F. Rejon-Barrera.
121. Crystalline confinement,
PoS LATTICE2013 (2014) 333,
with D. Banerjee, P. Widmer and F.-J. Jiang.
122. Two-dimensional lattice gauge theories with superconducting quantum circuits,
Annals Phys. 351 (2014) 634,
with D. Marcos, P. Widmer, E. Rico, M. Hafezi, P. Rabl, and P. Zoller.
123. Towards Quantum Simulating QCD,
Nucl. Phys. A931 (2014) 246.
124. From doubled Chern-Simons-Maxwell lattice gauge theory to extensions of the toric code,
Annals Phys. 361 (2015) 303,
with T. Z. Olesen and N. D. Vlasii.
125. $CP(N - 1)$ Quantum field theories with alkaline-earth atoms in optical lattices,
Annals Phys. 370 (2016) 117,
with C. Laflamme, W. Evans, M. Dalmonte, U. Gerber, H. Meja-Daz, W. Bietenholz, and P. Zoller.
126. An improved single-plaquette gauge action,
JHEP 1603 (2016) 116,
with D. Banerjee, M. Bögli, K. Holland, F. Niedermayer, M. Pepe, and U. Wenger.

127. Graphical tensor product reduction scheme for the Lie algebras $so(5) = sp(2)$, $su(3)$, and $g(2)$,
Annals Phys. 371 (2016) 199,
with N. Vlasii and F. von Rütte.
128. Proposal for the quantum simulation of the $CP(2)$ model on optical lattices,
PoS LATTICE2015 (2016) 311,
with C. Laflamme, W. Evans, M. Dalmonte, U. Gerber, H. Meja-Daz, W. Bietenholz, and P. Zoller.
129. Doubled lattice Chern-Simons-Yang-Mills theories with discrete gauge group,
Annals Phys. 374 (2016) 255,
with S. Caspar, D. Mesterházy, T. Z. Olesen and N. D. Vlasii.
130. $SO(3)$ "nuclear physics" with ultracold gases,
Annals Phys. 393 (2018) 466,
with E. Rico, M. Dalmonte, P. Zoller, D. Banerjee, M. Bögli, and P. Stebler.
131. $SU(3)$ quantum spin ladders as a regularization of the $CP(2)$ model at non-zero density: From classical to quantum simulation,
Annals Phys. 398 (2018) 94-122,
with W. Evans, U. Gerber, and M. Hornung.
132. Rotor Spectra and Berry Phases in the Chiral Limit of QCD on a Torus,
Phys. Rev. D97 (2018) 114029,
with N. D. Vlasii.
133. Meron- and Semi-Vortex-Clusters as Physical Carriers of Topological Charge and Vorticity,
PoS LATTICE2019 (2019) 288,
with W. Bietenholz, J. C. Pinto Barros, S. Caspar, and M. Hornung.
134. Simulating Lattice Gauge Theories within Quantum Technologies,
Eur. Phys. J. D74 (2020) 165,
with M. C. Banuls, R. Blatt, J. Catani, A. Celi, J. I. Cirac, M. Dalmonte, L. Fallani, K. Jansen, M. Lewenstein, S. Montangero, C. A. Muschik, B. Reznik, E. Rico, L. Tagliacozzo, K. Van Acoleyen, F. Verstraete, M. Wingate, J. Zakrzewski, and P. Zoller.

Condensed Matter Physics

135. Blockspin cluster algorithms for quantum spin systems,
Phys. Lett. A168 (1992) 143,
with H.-P. Ying.

- 136. Blockspin scheme and cluster algorithm for quantum spin systems,
Nucl. Phys. B (Proc. Suppl.) 30 (1993) 281,
with H.-P. Ying.
- 137. Loop-cluster algorithm: an application to the 2-d quantum Heisenberg antiferromagnet,
Phys. Lett. A183 (1993) 441,
with D.-R. Ji and H.-P. Ying.
- 138. A determination of the low energy parameters of the 2-d Heisenberg antiferromagnet,
Z. Phys. B93 (1994) 147,
with H.-P. Ying.
- 139. Meron-cluster simulation of the θ -vacuum in the 2-d $O(3)$ -model,
Phys. Rev. Lett. 75 (1995) 4524,
with W. Bietenholz and A. Pochinsky.
- 140. Testing Haldane's conjecture in the $O(3)$ model by a meron cluster simulation,
Nucl. Phys. B (Proc. Suppl.) 47 (1996) 727,
with W. Bietenholz and A. Pochinsky.
- 141. A Monte Carlo study of correlations in quantum spin ladders,
Phys. Rev. Lett. 77 (1996) 1865,
with M. Greven and R. J. Birgeneau.
- 142. Simulations of discrete quantum systems in continuous Euclidean time,
Phys. Rev. Lett. 77 (1996) 5130,
with B. Beard.
- 143. Spin ladders,
Physics News in 1996, AIP,
with M. Greven and R. Birgeneau.
- 144. Simulations of discrete quantum systems in continuous time,
Nucl. Phys. (Proc. Suppl.) 53 (1997) 838,
with B. Beard.
- 145. The square-lattice Heisenberg antiferromagnet at very large correlation lengths
Phys. Rev. Lett. (1998) 1742,
with B. B. Beard, R. J. Birgeneau and M. Greven.
- 146. Monte Carlo study of correlations in quantum spin chains at non-zero temperature,
Eur. Phys. J. B4 (1998) 291, with R. J. Birgeneau, M. Greven and Y. J. Kim.

147. Lattice fluid dynamics from perfect discretizations of continuum flows,
Phys. Rev. E 58 (1998) 5796,
with E. Katz.
148. Green's functions from quantum cluster algorithms,
Physica A261 (1998) 520,
with R. Brower and S. Chandrasekharan.
149. Meron-cluster simulation of quantum spin ladders in a magnetic field,
cond-mat/9909451,
with S. Chandrasekharan and B. Scarlet.
150. From spin ladders to the 2-d $O(3)$ model at nonzero density,
Comput. Phys. Commun. 147 (2002) 388,
with S. Chandrasekharan and B. Scarlet.
151. Meron-cluster approach to systems of strongly correlated electrons,
Nucl. Phys. B673 (2003) 405,
with S. Chandrasekharan, J. Cox, and J. C. Osborn.
152. Computational complexity and fundamental limitations to fermionic quantum
Monte Carlo simulations,
Phys. Rev. Lett. 94 (2005) 170201,
with M. Troyer.
153. Systematic low-energy effective theory for magnons and charge carriers in an
antiferromagnet,
Nucl. Phys. B729 (2005) 317,
with F. Kämpfer and M. Moser.
154. Magnon-mediated binding between holes in an antiferromagnet,
Eur. Phys. J. B53 (2006) 433,
with C. Brügger, F. Kämpfer, M. Moser, and M. Pepe.
155. Two-hole bound states from a systematic low-energy effective field theory for
magnons and holes in an antiferromagnet,
Phys. Rev. B74 (2006) 224432,
with C. Brügger, F. Kämpfer, M. Moser, and M. Pepe.
156. Homogeneous versus spiral phases of hole-doped antiferromagnets: a systematic
effective field theory investigation,
Phys. Rev. B75 (2007) 014421,
with C. Brügger, C. P. Hofmann, F. Kämpfer, and M. Pepe.
157. Systematic low-energy effective field theory for electron-doped antiferromagnets,
Phys. Rev. B75 (2007) 214405,
with C. Brügger, C. P. Hofmann, F. Kämpfer, M. Moser, and M. Pepe.

158. Spiral phases and two-particle bound states from a systematic low-energy effective theory for magnons, electrons, and holes in an antiferromagnet, *Physica B* 403 (2008) 1447, with C. Brügger, C. P. Hofmann, F. Kämpfer, M. Moser, and M. Pepe.
159. From an antiferromagnet to a valence bond solid: evidence for a first order phase transition, *J. Stat. Mech.* (2008) P02009, with F.-J. Jiang, M. Nyfeler, and S. Chandrasekharan.
160. Nested cluster algorithm for frustrated quantum antiferromagnets, *Phys. Rev. Lett.* 100 (2008) 247206, with M. Nyfeler, F.-J. Jiang, and F. Kämpfer.
161. Loop-cluster simulation of the zero- and one-hole sectors of the t - J model on the honeycomb lattice, *Phys. Rev.* B78 (2008) 214406, with F.-J. Jiang, F. Kämpfer, and M. Nyfeler.
162. Systematic effective field theory investigation of spiral phases in hole-doped antiferromagnets on the honeycomb lattice, *Eur. Phys. J.* 69 (2009) 473, with F.-J. Jiang, F. Kämpfer, and C. P. Hofmann.
163. Effective theories for magnetic systems, *PoS CD09* (2009) 072.
164. On the condensed matter analog of baryon chiral perturbation theory, *AiP Conf. Proc.* 1116 (2009) 356, with C. Brügger, C. P. Hofmann, F. Kämpfer, M. Moser, and M. Pepe.
165. Constraint effective potential of the staggered magnetization in an antiferromagnet, *J. Stat. Mech.* (2009) P03021, with U. Gerber, C. P. Hofmann, F.-J. Jiang, and M. Nyfeler.
166. Microscopic model versus systematic low-energy effective field theory for a doped quantum ferromagnet, *Phys. Rev.* B81 (2010) 064414, with U. Gerber, C. P. Hofmann, and F. Kämpfer.
167. Very high precision determination of low-energy parameters: the 2-d Heisenberg antiferromagnet as a test case, *Phys. Rev.* B83 (2011) 155120, with F.-J. Jiang.

168. Constraint effective potential of the magnetization in the quantum XY model, *J. Stat. Mech.* 1106 (2011) P06002, with U. Gerber, C. P. Hofmann, F.-J. Jiang, G. Palma, and P. Stebler.
169. Systematic low-energy effective field theory for magnons and holes in an antiferromagnet on the honeycomb lattice, *Phys. Rev. B* 85 (2012) 075123, with F. Kämpfer, B. Bessire, M. Wirz, C. P. Hofmann, and F.-J. Jiang.
170. Baryon chiral perturbation theory transferred to hole-doped antiferromagnets on the honeycomb lattice, *J. Phys. Conf. Ser.* 378 (2012) 012034, with F.-J. Jiang, F. Kämpfer, B. Bessire, M. Wirz, and C. P. Hofmann.
171. Symmetry analysis of holes localized on a Skyrmion in a doped antiferromagnet, *Phys. Rev. B* 86 (2012) 155113, with N. D. Vlasii, C. P. Hofmann, and F.-J. Jiang.
172. The $(2 + 1)$ -d $U(1)$ quantum link model masquerading as deconfined criticality, *J. Stat. Mech.* 2013 (2013) P12010, with D. Banerjee, F.-J. Jiang, and P. Widmer.
173. Real-time simulation of large open quantum spin systems driven by dissipation, *Phys. Rev. B* 90 (2014) 241104, with D. Banerjee, F.-J. Jiang, and M. Kon.
174. Interfaces, strings, and a soft mode in the square lattice quantum dimer model, *Phys. Rev. B* 90 (2014) 245143, with D. Banerjee, M. Bögli, C. P. Hofmann, F.-J. Jiang, and P. Widmer.
175. Holes localized on a skyrmion in a doped antiferromagnet on the honeycomb lattice: symmetry analysis, *Annals Phys.* 354 (2014) 213, with N. D. Vlasii, C. P. Hofmann, and F.-J. Jiang.
176. Real-time dynamics of open quantum spin systems driven by dissipative processes, *Phys. Rev. B* 92 (2015) 035116, with F. Hebenstreit, D. Banerjee, M. Hornung, F.-J. Jiang, and F. Schranz.
177. Real-time simulation of non-equilibrium transport of magnetization in large open quantum spin systems driven by dissipation, *Phys. Rev. B* 92 (2015) 121104, with D. Banerjee, F. Hebenstreit, and F.-J. Jiang.
178. Real-time simulation of dissipation-driven quantum systems, *PoS LATTICE2015* (2016) 281, with D. Banerjee, F. Hebenstreit, F.-J. Jiang, and M. Kon.

179. Dynamics of dissipative Bose-Einstein condensation,
 Phys. Rev. A93 (2016) 021602,
 with S. Caspar, F. Hebenstreit, D. Mesterházy.
180. Dissipative Bose-Einstein condensation in contact with a thermal reservoir,
 New J. Phys. 18 (2016) 073015,
 with S. Caspar, F. Hebenstreit, D. Mesterházy.
181. Real-time evolution of strongly coupled fermions driven by dissipation,
 Annal Phys. 372 (2016) 309,
 with E. Huffman, D. Banerjee, and S. Chandrasekharan.
182. Finite-volume energy spectrum, fractionalized strings, and low-energy effective
 field theory for the quantum dimer model on the square lattice,
 Phys. Rev. B94 (2016) 115120,
 with D. Banerjee, M. Bögli, C. P. Hofmann, F.-J. Jiang, and P. Widmer.
183. From the $SU(2)$ quantum link model on the honeycomb lattice to the quan-
 tum dimer model on the kagomé lattice: Phase transition and fractionalized flux
 strings,
 Phys. Rev. B97 (2018) 205108,
 with D. Banerjee, F.-J. Jiang, T. Z. Olesen, and P. Orland.

Quantum Mechanics

184. Runge-Lenz vector, accidental $SU(2)$ symmetry, and unusual multiplets for mo-
 tion on a cone,
 Ann. Phys. 323 (2008) 82,
 with M. Al-Hashimi.
185. Discrete accidental symmetry for a particle in a constant magnetic field on a
 torus,
 Ann. Phys. 324 (2009) 343,
 with M. Al-Hashimi.
186. Minimal position-velocity uncertainty wave packets in relativistic and non-relativistic
 quantum mechanics,
 Ann. Phys. 324 (2009) 2599,
 with M. Al-Hashimi.
187. Self-adjoint extensions for confined electrons: from a particle in a spherical cavity
 to the hydrogen atom in a sphere and on a cone,
 Ann. Phys. 327 (2012) 2742,
 with M. Al-Hashimi.

188. From a particle in a box to the uncertainty relation in a quantum dot and to reflecting walls for relativistic fermions,
Ann. Phys. 327 (2012) 1,
with M. Al-Hashimi.
189. Supersymmetric descendants of self-adjointly extended quantum mechanical Hamiltonians,
Ann. Phys. 337 (2013) 1,
with M. Al-Hashimi, M. Salman, and A. Shalaby.
190. Asymptotic freedom, dimensional transmutation, and an infra-red conformal fixed point for the δ -function potential in 1-dimensional relativistic quantum mechanics,
Phys. Rev. D89 (2014) 125023,
with M. H. Al-Hashimi and A. M. Shalaby.
191. Fate of accidental symmetries of the relativistic hydrogen atom in a spherical cavity,
Annals Phys. 362 (2015) 621,
with M. H. Al-Hashimi and A. M. Shalaby.
192. Majorana fermions in a box,
Phys. Rev. D95 (2017) 065007,
with M. H. Al-Hashimi and A. M. Shalaby.
193. A new concept for the momentum of a quantum mechanical particle in a box,
arXiv:2012.09596,
with M. H. Al-Hashimi.
194. Canonical quantization on the half-line and in an interval based upon a new concept for the momentum in a space with boundaries,
arXiv:2103.01715,
with M. H. Al-Hashimi.
